PROFESSIONAL SUMMARY

Adaptable Software Engineer with expertise in object-oriented programming, database design, and responsive web development. Versatile across multiple languages (Python, Java, C#, SQL) and development environments. Experienced in end-to-end debugging, software testing, and technical documentation, with a proven ability to learn emerging technologies rapidly and deliver dependable software solutions.

CORE COMPETENCIES

- Software Development Fundamentals
- Object-Oriented Programming
- Debugging & Troubleshooting
- Problem Solving
- Front-End/ Back-End Web Development
- Software Testing & Quality
- Database Fundamentals
- Version Control (Git)
- Technical Documentation
- Cross-Platform Operating Systems
- Team Collaboration
- Continuous Learning

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C#, SQL, NoSQL | **Web Technologies:** HTML, CSS, JavaScript | **Development Tools:** Git, Visual Studio Code, Eclipse, Unity, Anaconda | **Operating Systems:** Windows, Linux, macOS | **Concepts:** Database Design, Operating Systems, Web Interface Design | **Programs:** Microsoft Office Suite | Advanced Excel | QuickBooks

CERTIFICATIONS

NVIDIA Fundamentals of Deep Learning	April 2025
NVIDIA Generative AI with Diffusion Models	July 2025
NVIDIA Applications of AI for Predictive Maintenance	December 2025
Dell Client Foundations	May 2026
Apple Support Technician	July 2026

ACADEMIC PROJECTS

ECPI University | Glen Allen, VA

Object-Oriented Programming Lab

- Applied object-oriented programming concepts including classes, inheritance, polymorphism, and encapsulation while developing console-based applications in Java and C#
- Implemented algorithms, debugging techniques, and modular program design using Visual Studio Code and Eclipse
- Used Git for version control throughout programming assignments

Web Development Labs

- Developed responsive web interfaces using HTML, CSS, and JavaScript
- Built interactive web pages while applying user interface design principles and web development best practices
- Strengthened understanding of client-side programming, page structure, and browser-based application development

Database & SQL Labs

- Designed relational database structures and wrote SQL queries to retrieve, filter, join, and update data
- Applied database design principles including normalization and data integrity
- Practiced database development concepts through structured lab assignments

- Developed Python programs focused on data processing, automation, and problem solving
- Applied programming fundamentals including control structures, functions, file handling, and data manipulation
- Used Anaconda to complete programming exercises and analytical lab assignments

PROFESSIONAL EXPERIENCE

Insight Global | *Help Desk Support Technician*

May 2026 – Present

- Troubleshoot hardware, software, and operating system issues on Apple and Dell computers, quickly identifying problems and helping end users restore functionality
- Support macOS, Windows, and business applications while documenting solutions and explaining technical issues in a way that's easy for users to understand
- Manage support requests independently and work with teammates to resolve more complex technical issues in a fast-paced environment

Geek Squad | *Agent*

October 2021 – May 2026

- Diagnosed and resolved hardware, software, and operating system issues across Windows, macOS, and Linux systems, helping customers quickly restore functionality
- Automated repetitive support tasks with scripting, reducing manual work and improving team efficiency
- Installed, configured, and maintained operating systems and software while troubleshooting performance and compatibility issues

Wells Fargo | *Customer Service Representative*

December 2019 – July 2021

- Resolved complex account issues by researching discrepancies, identifying root causes, and delivering accurate solutions
- Helped customers confidently use digital banking tools by providing clear guidance and technical support

J.C. Penny | *Seasonal Warehouse Laborer*

July 2019 – December 2019

- Worked with team members to organize inventory, restock merchandise, and keep the sales floor ready during the busy holiday season

DBV Inc. | *Office & Field Assistant*

September 2017 – July 2019

- Supported residential remodeling projects while managing payroll, invoicing, and business records using QuickBooks, Excel, and Microsoft Office
- Streamlined office processes by automating data entry and standardizing documentation, making project tracking more efficient

Navy Federal Credit Union | *Member Service Representative*

July 2013 – September 2017

- Received the Cobb Award for member service excellence in 2016
- Researched and resolved complex account and loan issues while maintaining compliance with banking regulations
- Consistently exceeded sales goals by identifying opportunities to cross-service financial products and increasing product penetration

EDUCATION

Bachelor of Science in Computer Information Science – Software Development

August 2026

ECPI University | *Glen Allen, VA* | Dean's List (GPA: 3.94)
